

Instructions for Floccing the Pool

1. To Floc the Pool

Backwash the pool, Fill the pool with more water. Dissolve the floc in a bucket of water. 1 bottle or every 10,000 gallons of water. Pour the floc in to pool by distributing around the entire perimeter of the pool. Turn the system of and leave of until floc settles (24 to 48 hours later). Then vacuum on the waste cycle, then put on rinse cycle for a couple of minutes the switch back to filter.

OR

2. To Floc the Filter

Add $\frac{1}{4}$ to $\frac{1}{2}$ of floc to the skimmer instead of the pool. Let the filter run continuously until the system pressure reading is real high. Then backwash real good. Go from backwash to rinse for a few seconds and then switch back to the regular filter setting.
